08

Say hello to the possibility of clear near vision.

And the feeling of relief when you can reach for your eyedrops instead of your readers. With Qlosi eyedrops as an option, you can choose how you see up close.

Use this guide to learn about Qlosi and start quickly with confidence.

All about Qlosi™

Uniquely designed to treat your presbyopia.

An eyedrop to see up close.

AN EYE-FRIENDLY FORMULA

As you know, presbyopia is an age-related condition that eventually affects everyone. But now you have Qlosi, the first and only eye drop made with EyeQ Formulation™, which works by improving the eye's natural ability to focus on nearby objects and small details.

A WELL STUDIED SOLUTION

Qlosi was studied in five US clinical trials with people just like you who have presbyopia. People reported that their near vision improved with Qlosi, and that it was comfortable and easy to use throughout the day.

Most people did not experience side effects at all, but those who did reported that they were mild, brief, and went away after a short period of time.

Clear Start Week

Getting to know Qlosi.

The Clear Start Week is the time to help your eyes get used to their new ability to see up close and help you achieve your best near vision with Qlosi.

For these 7 days, it's recommended that you use Qlosi twice a day, every day in each eye.

QLOSI DOSING SCHEDULE

Step 1: Place one drop of Qlosi in each eye

Step 2: Use the second drop after 2 to 3 hours for an effect that can last up to 8 hours

Step 3: Discard open vials after use

Set a reminder: Use your smartphone to help you remember your daily doses.

Heads up: If you experience eye discomfort or headaches when you first use Qlosi, these should improve over a short time. Keeping your eyes closed for about 10 seconds after each drop may help. If you have any concerns, please reach out to your doctor.

What's next: After your eyes have adjusted to their new near vision in the Clear Start Week, you will be able to unlock the unique flexibility that comes with using Qlosi.

Track your Clear Start Week.

Mark each dose you take during the Clear Start Week to help you get your best near vision.

	Dose 1	Dose 2

Qlosi™ (pilocarpine HCl ophthalmic solution) 0.4%

Flexible dosing

Learn how to use Qlosi your way.

Use Qlosi™ once or twice daily, you decide.

After the Clear Start Week, you can now take advantage of the flexible dosing offered by Qlosi.

Use one drop in each eye if you need clear near vision for that special night out or simply when you want a break from your readers.

The second drop keeps your clear near vision going so you can continue to stay out while your readers stay in.

LOVING LIFE WITH QLOSI?

Let others know about your experience during Clear Start Week by scanning this QR code and sharing your story.

1x

2x

You can use Qlosi up to two times a day, every day, when and where it works for you.

Qlosi on the go

Take Qlosi with you on your next adventure.

IT'S READY WHEREVER YOU GO

Qlosi can travel with you and be used when needed. When you first get your box, put it in the refrigerator.

Once you open one of the foil pouches in the box, Qlosi can be left at room temperature for up to 30 days. This means you can take Qlosi with you on the go:

- to work
- on a business trip
- on vacation

WEAR CONTACTS OR USE OTHER EYE DROPS? NO PROBLEM.

If you wear contact lenses, simply remove them, use Qlosi, and **wait 10 minutes before** putting them back in. If you use other eye drops, **wait 5 minutes after** using Qlosi before using the other eye drops.

USES

Qlosi (pilocarpine ophthalmic solution) 0.4% is a prescription eye drop used to treat age-related blurry near vision (presbyopia) in adults

IMPORTANT SAFETY INFORMATION

- Do not use Qlosi if you are allergic to any of the ingredients
- Use caution when driving at night or performing hazardous activities in poor lighting. Qlosi may cause temporary dim or dark vision.
- Temporary problems when changing focus between near objects and distant objects may occur. Do not drive or operate machinery if your vision is not clear
- Seek immediate medical care if you experience sudden onset of flashes of light, floaters or vision loss
- If you wear contact lenses, they should be removed before using Qlosi. Wait 10 minutes after dosing before reinserting your contact lenses.
- Do not touch the tip of the vial to the eye or any other surface to prevent eye injury or contamination
- If you use more than one eye medication, use each medication at least 5 minutes apart
- The most common side effects reported with Qlosi in clinical trials are eye pain when administering Qlosi in your eye and headache. These are not all of the possible side effects with Qlosi.

To report suspected side effects, contact Orasis Pharmaceuticals at 1-866-ORASIS-1 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.
